Dear Sir/Madam,

Re: REFERENCE – FOCUS ENGINEERING

Fitzgerald Constructions has been working with Focus Engineering for well over 10 years, and I personally, have been working with them for over 5. In this time, Focus have demonstrated that they are a capable and thoughtful fabricator and contractor and complete their work to a high quality and in a timely fashion.

The larger projects that Focus have been involved with Fitzgerald's during this period are:

Melbourne Convention Centre Bridge

Focus fabricated all steel work and also produced the precast elements for the Job. This bridge was a design and construct project that meant construction was occurring concurrently with design. Focus assisted this process by being mindful of the process and looking for issues and suggesting solutions where appropriate.

Nicholson St Rail Bridge

Fabrication of all steelwork, and casting of concrete deck and precast approach slabs. All work carried out on time under a tight time line.

Northbank Promenade – Yarra River

Fabrication of architectural/structural steel elements.

Corio Interchange Bridge

Fabrication of temporary falsework.

Based on the foregoing, I have no hesitation in recommending Focus Engineering for relevant Corowa Shire Council works.

If further reference material is required, I would be pleased to do so.

Yours faithfully

Fitzgerald Constructions Australia Pty Ltd

Rian Calder
Design Manager
